# WE ARE ON A MISSION TO SAVE LIVES

Founded in 2015 in Stockholm, Sweden, Vobling empowers customers to explore the true power of VR, revolutionizing fire training for safety and sustainability.

# VR FIRE TRAINER™

Digital extinguishing exercises with VR are approved in Hot/Flammable Work courses in many countries including Sweden and Norway.

RECOMMENDED BY

**Brannvernforeningen**

## FULLY IMMERSIVE

The user will be immersed in the experience of fires, realistic fire spread, feel the stress of the alarm, see the smoke formation and then use the physical extinguisher to put out the fire in VR.

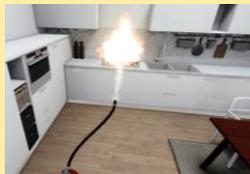

## MIXED REALITY

A real fire extinguisher is integrated into the solution, the user must use the extinguisher nozzle to aim and press the extinguisher handle to release the agent, in order to put out the fire in VR.

## ENVIRONMENTS

Various highly immersive and 3D surroundings that engage the user in a realistic fire scenario. We have the most common spaces where you are most likely to encounter a fire.

## FIRE SIMULATION

Using a voxel based physics system, fire spreads realistically in different materials and reacts naturally to different fire agents.

## EFFICIENCY

This combination of physical equipment and immersive software makes it possible to train multiple fire scenarios within minutes.

## PERFORMANCE

Measuring the user's training performance in each fire scenario, time to extinguish, remaining extinguisher medium and how much smoke the user inhales.

## A SMARTER WAY TO TRAIN

The VR Fire Trainer is a fully mobile digital fire safety solution that simulates real fire scenarios. Integrated with a real extinguisher, it provides a hands-on experience anytime, anywhere.

**BRIEF INTRODUCTION**

# VR FIRE TRAINER™

## FIGHT FIRES WITHOUT FIRE

### COST EFFECTIVE AND ACCESSIBLE

Train more people for less with the VR Fire Trainer, the most affordable fire safety solution. Practice anytime and anywhere without weather restrictions, travel, or extra materials.

### SAVE LIVES

Learn to fight fires safely in a realistic and risk-free environment. Different fire types and extinguishers while receiving real-time feedback to improve your response.

### COMPLIES TO HTM 05-03 PART A REQUIREMENTS

The VR Fire Trainer enables you to meet practical fire extinguisher requirements while simultaneously engaging your learners like never before. It leverages all the advantages mentioned above to provide a comprehensive and effective training experience.

### ENVIRONMENTALLY FRIENDLY AND SUSTAINABLE

No chemicals, no waste, no pollution. The VR Fire Trainer is the safest and most sustainable way to learn fire safety. Reduce emissions and costs with our fully digital training solution.

### LEARNING QUALITY

Track performance, receive insights, and improve memory retention for faster and more effective emergency response.

## THE PRODUCT INCLUDES

### INTERACTIVE EXTINGUISHER

### VR FIRE TRAINER APPLICATION

 Meta Quest

  
VIVE FOCUS

The product is sold as a yearly subscription billed annually.

There is a special deal for NHS Trusts.

Quantity discounts are available.

\* Please note that the VR headset is not included in our product and is needed to be purchased separately.

# NHS CASE STUDY

“

The introduction of Virtual Reality (VR) fire extinguisher training to Salisbury NHS Foundation Trust offers significant benefits. It enhances staff engagement by providing immersive, realistic fire scenarios that improve knowledge retention and decision-making under pressure. Training is safe, repeatable, accessible and the equipment is easy to use. Environmentally, VR eliminates the need for physical extinguisher use, reducing chemical waste and the carbon footprint associated with traditional training. Cost-wise, it lowers expenses related to consumables, travel, and off-site training, with scalable implementation across departments. The highquality graphics of VR systems deliver realistic simulations, making training highly relevant to hospital settings. Overall, VR fire training is a cost-effective, environmentally friendly, and engaging way to improve fire safety preparedness in the NHS

”

- Ian “Harry” Harrison GIFireE , Fire Safety Advisor, Salisbury District Hospital

Learning by doing!

From day one of our VR Fire Trainer you'll gain an invaluable experience by actively engaging in realistic fire scenarios, learning the correct use of fire extinguishers and fire safety gear. Our engaging content is designed to help you learn the safety skills in a fun way, hands-on experience. This immersive approach not only helps you learn faster but also increases retention, leading to better outcomes.

In VR mode, we're excited to show some safety options.

Have your safety! Read Thomas from VR Fire Trainer in Action, using VR to enhance fire training. 1/2
